Drama and Innovation from Brentano

Innovative dyeing process produces dramatic color shifts for new cotton velvet Chatoyance

Wheeling, IL. (November 2015) — Brentano reserved a truly special fabric for their 25th anniversary, an occasion marked by this fall's Jubilee collection and its 20 textile patterns. Suited to the most sumptuous interiors, **Chatoyance** combines a new dyeing technique with an extremely soft and smooth cotton velvet in a perfect balance of tradition and innovation.

From the French for "cat's eye," Chatoyance's dramatic, fluid shifts in color owe to a unique process where the fabric is gathered and sprayed with a random, yet repeatable, pattern of dyes. As a result, each yard of marbled colors is unique. The four colorways allude to natural landforms and the movement of light across water with the luxurious quality expected in a home and the drama of a perfectly orchestrated public space. The 54" cotton velvet's dense construction passes 50,000 double rubs (Wyzenbeek, Cotton Duck) for both high-end residential, hospitality and contract applications.

About Brentano:

The Brentano Design Studio, led by Iris Wang, celebrates 25 years in 2015. The textile house has grown from a modest eight patterns in 1990 into an international source for polyurethane faux leather, outdoor, Crypton, Nano-Tex and GreenShield-finished, eco-friendly and fire retardant products. The carefully curated line reflects Iris' lifelong study of fine art, nature and Asian philosophy in beautiful, high-performing solutions for the contract, hospitality, healthcare and residential markets. Please visit www.brentanofabrics.com for more information.
