Crypton Fabric Care

How to Clean Crypton?

Throughout the years Crypton has recommended that a mild powdered enzyme detergent mixed with water is a very effective way to clean Crypton. It still is. If you choose to use an enzyme detergent, mix 5 parts water with 1 part enzyme detergent (like Tide®/Cheer®).

EASY CLEANING STEPS

- Apply the soap and water solution to the spot.
- Work area using soft brush or edge of spoon from outside of spot towards the middle.
- Allow solution to work for approximately one minute.
- Extract with clean water or blot with clean soft white towel.
- Repeat as necessary until spot is removed.
- Rinse with clear water and blot as a final step to rinse away soap.

HELPFUL HINTS

- Before cleaning, vacuum the upholstery.
- Never spread the spot to the surrounding clean fiber.
- Go slowly; repeat the steps until the spot is removed.
- Do not use a stiff brush that may scratch or tear fibers in the fabric.
- Always seek to reduce the size of the spot.
- As always, test the soap and water solution in a hidden area before proceeding.

WATER EXTRACTION CLEANING

Water extraction cleaning is another fine method of thoroughly cleaning Crypton. Spots can be removed by pre-treating them with the soap solution outlined above or a pre-treatment solution from an upholstery cleaning company. Most solutions provided by these companies are acceptable for Crypton fabrics.

CRYPTON CARE CLEANERS

- Because most facilities do not allow employees to mix their own cleaning solutions, Crypton developed cleaners to make easy work of cleaning difficult stains.
- Crypton manufactures products for fabric cleaning, leather and vinyl cleaning, outdoor fabric cleaning and specialty cleaners designed to be safe and effective.
- EPA approved Disinfectant and Deodorizer to safely clean and disinfect Crypton barrier fabrics.
- Crypton has a team of customer support personnel to offer cleaning solutions and training support as well as a contractor cleaning program to help facilities keep fabrics beautiful and clean.
