

Environmentally Friendly Textiles by BRENTANO, Inc.

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Scene 9649**

CONTENTS: 50% Acrylic, 25% Wool, 25% Polyester (75% Recycled Content)

USAGE: Eco-fabric, Upholstery, Residential Drapery, Reversible

1. Scene is made from 45% post-consumer recycled content. Post-consumer waste is recovered from a material or finished product from the consumer supply chain (primarily from used textiles) that has served its intended use and has been discarded for disposal. Using recycled fibers preserves the resources needed to manufacture new fibers and reduces waste destined for landfills.
2. Scene is made from 30% post-industrial recycled content. Post-industrial waste is recovered from the production process at spinning mills that has been discarded for disposal.
3. PFAS-Free Stain Repellent.
4. The mill that manufactures Scene has environmentally conscious practices in place, including a waste reclamation process. Additionally, the manufacturing process conserves energy by using 40% solar power as an alternative energy source.
5. Scene is made with no known toxins or hazardous components.
6. The overall contents of Scene includes 25% wool. Wool is a biodegradable, rapidly renewable resource.
7. This product does not off-gas hazardous chemicals or substances into the air after installation.
8. Recycled yarns are dyed in a yarn dyeing facility which conserves the use of water and other chemical substances.
