

## Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

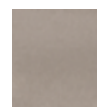

PRODUCT: **Lenis - 7571**

CONTENTS: Pile: 50% PC Recycled FR Polyester, 50% FR Polyester;  
Overall: 53% PC Recycled FR Polyester, 47% Polyester

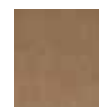

USAGE: Eco-fabric, Upholstery, Drapery

1. Lenis is made from 53% post-consumer recycled polyester content.  
Post-consumer waste is recovered from a material or finished product from the consumer supply chain that has served its intended use and has been discarded for disposal. Using recycled fibers preserves the resources needed to manufacture new fibers and reduces waste destined for landfills.
2. The mill that manufactures Lenis has environmentally conscious practices in place, including renewable energy resources used during the manufacturing process.
3. Waste created in the manufacturing process of Lenis is reclaimed and recycled.
4. Lenis is compliant with environmental and green building standards such as Oeko-Tex Standard 100 and is eligible for possible LEED points.
