

Environmentally Friendly Textiles and Wallcoverings by BRENTANO, Inc.

Green Story

Environmental impact and sustainability specifications of Brentano Green fabrics

PRODUCT: **Blurb 3206**
CONTENTS: 51% Post-Consumer Recycled Polyester, 49% Polyester
USAGE: Eco-Fabric, Upholstery

- 1. Made from 51% Recycled Content:** Blurb incorporates recycled fibers sourced from post-consumer waste. Post-consumer waste is recovered from products from the consumer supply chain (primarily from used textiles and bottles) that have served their intended use and has been discarded for disposal. Using recycled fiber preserves the resources needed to manufacture new fibers, promotes a circular economy, and reduces waste destined for landfills, giving discarded materials a meaningful second chance.
- 2. Manufactured in the U.S.A.:** Crafted close to home, Blurb is manufactured in the U.S.A. from U.S.A. sourced materials. Blurb supports local industries and minimizes transportation emissions.
- 3. Solution-Dyed Content:** The color production for Blurb is designed with care, utilizing methods that minimize water usage, further reducing its environmental impact compared to traditional water intensive dyeing methods.
- 4. Free of LBC Red List Chemicals:** The fabric complies with the Red List criteria, ensuring it is free of harmful chemicals that can pose risks to human health or the environment.
